## Preface

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee SF-006, Eye and Face Protection, to supersede AS/NZS 4066:1992, *Eye protectors for racquet sports*.

The objective of this document is to specify requirements for all eye protectors intended for eye protection against hazards during playing or instructing in the sports of squash, racquetball and squash 57, as well as sports with similar hazards and no greater risks. It applies to eye protectors that incorporate prescription lenses but has no specific tests for eye protectors designed for use over spectacles.

It also specifies requirements and testing for materials, performance, marking of eye protectors and information to be supplied by the manufacturer.

This document does not apply to —

- (a) sports eye protectors designed for use over prescription spectacles;
- (b) eye protectors for other occupational applications;
- (c) eye protectors without lenses;
- (d) eye protectors for sports where the hazards are unrelated to the hazards in or involve greater risks than squash, racquetball and squash 57, and;
- (e) eye protectors with gradient-tinted lenses because they are not appropriate for squash, racquetball or squash 57.

This document is an adoption with national modifications, and has been reproduced from, ISO 18527-2:2021, *Eye and face protection for sports use — Part 2: Requirements for eye protectors for squash and eye protectors for racquetball and squash 57*.

The modifications are additional requirements and are set out in [Appendix ZZ](#), which has been added at the end of the source text.

[Appendix ZZ](#) lists the modifications to ISO 18527-2:2021 for the application of this document in Australia and New Zealand.

As this document has been reproduced from an International document, a full point substitutes for a comma when referring to a decimal marker.

Australian or Australian/New Zealand Standards that are identical adoptions of international normative references may be used interchangeably. Refer to the online catalogue for information on specific Standards.

The terms “normative” and “informative” are used in Standards to define the application of the appendices or annexes to which they apply. A “normative” appendix or annex is an integral part of a Standard, whereas an “informative” appendix or annex is only for information and guidance.
