### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com.au](http://www.saiglobal.com.au) or Standards New Zealand web site at [www.standards.co.nz](http://www.standards.co.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of either Standards Australia or Standards New Zealand at the address shown on the back cover.

---

*This Standard was issued in draft form for comment as DR 02016.*

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee CS-018, Safety of Children's Toys.

*This Standard incorporates Amendment No. 1 (January 2010). The changes required by the Amendment are indicated in the text by a marginal bar and amendment number against the clause, note, table, figure, or part thereof affected.*

The objective of this Standard is to provide toxicity requirements for toys and toxicity labelling requirements for certain materials used in toys.

A1 | This Standard is an adoption with national modifications and has been reproduced from ISO 8124-3:1997, *Safety of toys, Part 3: Migration of certain elements*, and has been varied to take account of Australian/New Zealand conditions. Variations are set out in Appendix ZZ.

As this Standard is reproduced from an international publication, the following applies.

- (a) Its number appears on the cover and title page while the International Standard number appears only on the cover.
- (b) In Clause 1.1 of the source text, insert the word 'only' before the word 'specific'.
- (c) In the source text, 'this part of ISO 8124' should read 'this Australian/New Zealand Standard'.
- (d) A full point substitutes for a comma when referring to a decimal marker.

References to international Standards should be replaced by Australian, New Zealand or Australian/New Zealand Standards, as follows:

<i>Reference to International Standard or other publication</i>		<i>Australian/New Zealand Standard</i>	
ISO		AS/NZS ISO	
8124	Safety of toys	8124	Safety of toys
8124-1	Part 1: Mechanical and physical properties	8124.1	Part 1: Safety aspects related to mechanical and physical properties (ISO 8124-1:2000, MOD)
3696	Water for analytical laboratory use— Specification and test methods	—	

The terms 'normative' and 'informative' have been used in this Standard to define the application of the annex or appendix to which they apply. A 'normative' annex or appendix is an integral part of a Standard, whereas an 'informative' annex or appendix is only for information and guidance.
