

Australian Standard™

Commercial catering gas equipment

This Australian Standard was prepared by Committee AG-001, Gas appliances. It was approved on behalf of the Council of Standards Australia on 4 August 2004. This Standard was published on 8 October 2004.

The following are represented on Committee AG-001:

AGA Certification Services
Appliance and Component Testing
Australian Liquefied Petroleum Gas Association
Gas Appliance Manufacturers Association of Australia
Gas Technical Regulators Committee
National Association of Food Equipment Suppliers

Keeping Standards up-to-date

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about Standards can be found by visiting the Standards Web Shop at www.standards.com.au and looking up the relevant Standard in the on-line catalogue.

Alternatively, the printed Catalogue provides information current at 1 January each year, and the monthly magazine, *The Global Standard*, has a full listing of revisions and amendments published each month.

Australian Standards™ and other products and services developed by Standards Australia are published and distributed under contract by SAI Global, which operates the Standards Web Shop.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Contact us via email at mail@standards.org.au, or write to the Chief Executive, Standards Australia International Ltd, GPO Box 5420, Sydney, NSW 2001.

This Standard was issued in draft form for comment as DR 04157.

STANDARDS AUSTRALIA

RECONFIRMATION

OF

AS 4563—2004

Commercial catering gas equipment

RECONFIRMATION NOTICE

Technical Committee AG-001 has reviewed the content of this publication and in accordance with Standards Australia procedures for reconfirmation, it has been determined that the publication is still valid and does not require change.

Certain documents referenced in the publication may have been amended since the original date of publication. Users are advised to ensure that they are using the latest versions of such documents as appropriate, unless advised otherwise in this Reconfirmation Notice.

Approved for reconfirmation in accordance with Standards Australia procedures for reconfirmation on 25 September 2015.

The following are represented on Technical Committee AG-001:

Association of Accredited Certification Bodies
Australian Building Codes Board
Consumer Electronics Suppliers Association
Consumers Federation of Australia
Energy Efficiency and Conservation Authority of New Zealand
Energy Networks Association
Gas Appliance Manufacturers Association of Australia
Gas Association of New Zealand
Gas Energy Australia
Gas Technical Regulators Committee
Gas Utilisation Institute, New Zealand
The Australian Gas Association
Worksafe—Energy Safety New Zealand

NOTES

Australian Standard™

Commercial catering gas equipment

Originated as AS 4563/AG 300—2003.
Revised and redesignated as AS 4563—2004.

PREFACE

This Standard was prepared by the Standards Australia Subcommittee AG-001-03 Commercial catering gas equipment under the responsibility of Standards Australia Committee AG-001, Gas appliances to supersede AS 4563/AG 300—2003, *Commercial catering gas equipment*.

The objective of this Standard is to provide manufacturers, designers, regulatory authorities, testing laboratories and similar organizations with uniform minimum requirements for the safety, performance and use of domestic outdoor gas barbecues.

This Standard should not be regarded as a design specification or as an instruction manual.

In its preparation, consideration has been given to—

- continuity of satisfactory operation;
- the prevention of fire hazards, and explosions;
- the prevention of injury to persons or property;
- gas rules and regulations now in force; and
- relevant International Standards.

The principal differences between this edition and AS 4563/AG 300—2003, are:

- Minor amendment to Clause 1.3.66 and deletion of Clause 1.3.83 and subsequent renumbering.
- Clause 13.2.5 is moved into Section 2 to become Clause 2.1.8.
- Clause 2.2.3 amended to reflect deletion of Clause 1.3.83.
- A Note in Clause 2.6 refers to AS 5601.
- Clause 2.6.3 amended to remove reference to ANSI B1.20.3.1.
- Include implementation date under Table 3.1.
- M.O.T. 3.4.1/2/3 amended.
- Scope of M.O.T. 3.5.1 amended.
- M.O.T. 4.2/3 amended to include missing step.

AS 5601/AG 601, *Gas Installations* provides essential requirements and basic standards for gas installations.

The terms ‘normative’ and ‘informative’ have been used in this Standard to define the application of the appendix to which they apply. A ‘normative’ appendix is an integral part of a Standard, whereas an ‘informative’ appendix is only for information and guidance.

Statements expressed in mandatory terms in notes to tables and figures are deemed to be requirements of this Standard.

STANDARDS AUSTRALIA

Australian Standard

Commercial catering gas equipment

SECTION 1 SCOPE, APPLICATION AND
DEFINITIONS

1.1 SCOPE

This Standard applies to various types of commercial catering equipment intended for use with natural gas, town gas, liquefied petroleum gas and tempered liquefied petroleum gas.

NOTE: Other statutory and regulatory requirements may be applicable to the product(s) that fall within the scope of this standard. It is the manufacturer's, importer's or distributor's responsibility (as appropriate) to ensure that products comply with such requirements.

1.2 APPLICATION

Appliances shall comply with the requirements of Sections 2, 3 and 4, and with the requirements of at least one of the following Sections according to the nature of the appliance.

Section 5: Boiling tables—Open and closed top, Chinese cooking tables

Section 6: Salamanders, grillers and toasters

Section 7: Solid grill plates and griddles

Section 8: Barbecue grillers

Section 9: Ovens

Section 10: Boiling water units

Section 11: Stockpots and brat pans

Section 12: Atmospheric steamers

Section 13: Fryers

Section 14: Food warmers including bains marie

Section 15: Pasta cookers and rethermalizers

1.3 DEFINITIONS

1.3.1 Appliance flueway

A port or passage conveying flue gases within the appliance.

1.3.2 Appliance regulator

A device fitted to an appliance to control the gas pressure or gas volume delivered to that appliance.

1.3.3 Atmospheric burner

A burner system where all the air for combustion is introduced by the inspirating effect of a gas injector and/or by the natural draught in the combustion chamber without mechanical assistance.
