

Household portable appliances for cooking, grilling and similar use — Methods for measuring performance

The European Standard EN 61817:2001, with the incorporation of amendment A1:2004, has the status of a British Standard

ICS 97.040.20

National foreword

This British Standard is the official English language version of EN 61817:2001, including amendment A1:2004. It is identical with IEC 61817:2000.

The UK participation in its preparation was entrusted by Technical Committee CPL/59, Performance of household electrical equipment, to Subcommittee CPL/59/7, Small kitchen appliances, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

From 1 January 1997, all IEC publications have the number 60000 added to the old number. For instance, IEC 27-1 has been renumbered as IEC 60027-1. For a period of time during the change over from one numbering system to the other, publications may contain identifiers from both systems.
