Part 5: High pressure cleaners and steam cleaners for household and commercial use – Methods for measuring performance (IEC 62885-5:2018)

## National foreword

This British Standard is the UK implementation of EN IEC 62885-5:2018. It is identical to IEC 62885-5:2018.

BSI, as a member of CENELEC, is obliged to publish EN IEC 62885-5:2018 as a British Standard. However, attention is drawn to the fact that during the development of this European Standard, the UK committee voted against its approval.

The UK committee voted against EN IEC 62885-5:2018 because several important sections appear as 'Under consideration' and clause 5, High pressure cleaner efficiency tests, only covers oil-heated high pressure cleaners.

The UK participation in its preparation was entrusted to Technical Committee CPL/59/6, Floor treatment appliances.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
