Legal Notice for Standards

Canadian Standards Association (operating as “CSA Group”) develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group’s and/or others’ intellectual property and may give rise to a right in CSA Group and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA Group reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Canadian Standards Association (operating as “CSA Group”), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group’s standards development by volunteering their time and skills to Committee work and supporting CSA Group’s objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group’s total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group’s standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

Technical Committee on the Installation Code for Hydronic Heating Systems 7

Preface 10

1 Scope 12

- 1.1 General 12
- 1.2 Inclusions 12
- 1.3 Interchangeable terms 12
- 1.4 Terminology 12
- 1.5 Units of measure 12

2 Reference publications 13

3 Definitions 17

4 General requirements 19

- 4.1 Component selection 19
- 4.2 Selection of equipment 19
 - 4.2.1 Suitability of equipment 19
 - 4.2.2 Capacity of equipment 20
 - 4.2.3 Oxygen permeation 20
 - 4.2.4 Hydronic fluid 21
 - 4.2.5 Potable water as a hydronic fluid 21
 - 4.2.6 Prevention of thermosiphons 22
 - 4.2.7 Flow check valves 22
- 4.3 Installation of equipment 22
 - 4.3.1 General 22
 - 4.3.2 Training of personnel 22
 - 4.3.3 Quality of work 22
 - 4.3.4 Accessibility 22
 - 4.3.5 Electrical wiring and equipment 23
 - 4.3.6 Protection during construction 23
 - 4.3.7 Replacement parts 23
- 4.4 Safety/relief valves 23
 - 4.4.1 Pressure-relief valves 23
 - 4.4.2 Steam (pop safety) valves 23
 - 4.4.3 Combination pressure- and temperature-relief valves 23
 - 4.4.4 Discharge piping 23
- 4.5 Start-up procedures 24
 - 4.5.1 Pressure test 24
 - 4.5.2 Flushing 24
 - 4.5.3 Testing controls 24
 - 4.5.4 Inspection of heat source 24
- 4.6 Responsibility of installer 25
 - 4.6.1 Installation 25
 - 4.6.2 System documentation and operational instructions 25

5	Heating equipment	26
5.1	General	26
5.2	Energy source	26
5.2.1	Gas-fired equipment	26
5.2.2	Oil-fired equipment	26
5.2.3	Solid-fuel-fired equipment	26
5.2.4	Electric-resistance heating equipment	26
5.2.5	Solar heating systems	26
5.2.6	Geothermal heating systems	26
5.2.7	Heat pumps	26
5.3	Heating appliances	26
5.3.1	Boilers	26
5.3.2	Dual-purpose water heater equipment	27
5.3.3	Integrated mechanical systems	27
6	Circulators (circulating pumps)	27
6.1	General	27
6.2	Materials of construction	27
6.3	Circulator sizing	27
6.4	Circulator location	27
6.5	Circulator support	27
7	Expansion tanks	28
7.1	General	28
7.1.1	Closed-loop system	28
7.1.2	Multiple expansion tanks	28
7.1.3	Accessibility	28
7.2	Closed expansion tanks	28
7.3	Open expansion tanks (open to atmosphere)	28
7.3.1	General	28
7.3.2	Conversion of open expansion tank systems	28
7.4	Secondary loops	28
8	Distribution piping	29
8.1	Proximity to heat source	29
8.2	Unconditioned spaces	29
8.3	Inspection and test	29
8.4	General	29
8.4.1	Expansion and contraction	29
8.4.2	Minimizing stresses	29
8.4.3	Support	29
9	Pipe, tube, and tubing	29
9.1	Metallic pipe and tube	29
9.2	Non-metallic pipe and tubing	29
9.2.1	Cross-linked polyethylene (PEX) tubing	29
9.2.2	Chlorinated polyvinyl chloride (CPVC) pipe and tubing	30
9.2.3	Metal/plastic PEX-AL-PEX composite pipe	30
9.2.4	Metal/plastic PERT-AL-PERT composite pipe	30
