Inline-skates –
Safety requirements and test methods
English version of DIN EN 13843:2009-08**

Rollsportgeräte –
Inline-Skates –
Sicherheitstechnische Anforderungen und Prüfverfahren
Englische Fassung DIN EN 13843:2009-08

Document comprises 16 pages

Start of validity

This standard takes effect on 1 August 2009.

National foreword

This standard includes safety requirements within the meaning of the *Geräte- und Produktsicherheitsgesetz* (German Equipment and Product Safety Act).

This standard has been prepared by Technical Committee CEN/TC 136 “Sports, playground and other recreational facilities and equipment” (Secretariat: DIN, Germany), Working Group WG 10 “Roller sports equipment”.

The responsible German body involved in its preparation was the *Normenausschuss Sport- und Freizeitgerät* (Sports Equipment Standards Committee), Technical Committee NA 112-01-07 AA *Rollsportgeräte*.

Once this standard has been identified by the Committee for Technical Work Equipment and Consumer Products and published in the *Bundesanzeiger* (German Federal Gazette), compliance of inline-skates as in this standard with the relevant health and safety requirements (i.e. as in the GPSG) may be presumed.

The German GS mark (GS stands for *Geprüfte Sicherheit*, meaning safety tested) may then be applied to the inline-skates under the provisions of § 7 of the GPSG.

The DIN Standard corresponding to the European Standard referred to in this document is as follows:

EN 22768-1 DIN ISO 2768-1

Amendments

This standard differs from DIN EN 13843:2003-05 as follows:

- a) Subclause 5.3 “Last” has been added.
- b) Subclause 5.4.7 “Loosening of attached starting and/or braking devices” has been added.
- c) The attachment of the chassis to the shoe in the former subclause 5.4.1 has been modified.
- d) In subclause 7.2.3 b), the specification on service and maintenance has been modified.
