

#### **E.4.7 Gefahren durch heiße und kalte Oberflächen**

Artikel für Kinder und Säuglinge kommen häufig mit der Haut oder dem Mund eines Kindes in Berührung. Wenn die Oberflächen dieser Artikel zu heiß oder zu kalt sind, kann es zu Verbrennungen kommen.

Da Kinder nur begrenzt dazu in der Lage sind, auf den Kontakt mit heißen und kalten Oberflächen zu reagieren, ist ein Schutz erforderlich. Der Tastsinn von Kindern unterscheidet sich von Erwachsenen.

Bis zu einem Alter von 24 Monaten verfügen Kinder nicht über ausreichend schnelle Reflexe, um auf den Kontakt mit einer heißen Oberfläche zu reagieren. Dadurch könnte der Kontakt bei sehr jungen Kindern bis zu 15 s andauern (Auszug aus CENELEC Guide 29).

Es ist unwahrscheinlich, dass Artikel für Kinder und Säuglinge darauf ausgelegt sind, Hitze zu erzeugen.

Für den Fall, dass ein Artikel für Kinder und Säuglinge im Gebrauch Hitze erzeugt, sind in EN ISO 13732-1 Höchsttemperaturen empfohlen, die bei der Erarbeitung von Normen für Artikel für Kinder und Säuglinge als Richtwerte verwendet werden können.

#### **E.4.8 Produktinformationen**

Die Festlegung des Schwerpunkts aus der früheren Fassung des Textes wurde entfernt, weil die Messungen im Falle eines Sitzes mit verstellbarer Rückenlehne schwierig sind. In manchen Ländern (z. B. Deutschland) ist die Kennzeichnung des Schwerpunkts am Produkt gesetzlich vorgeschrieben. Der Schwerpunkt nach EN 14344:2004 entspricht nicht dem tatsächlichen Schwerpunkt. Umfassende Informationen und Warnungen wurden als wertvoller für den Anwender befunden als eine falsche Angabe.

This draft European Standard is submitted to CEN members for second enquiry. It has been drawn up by the Technical Committee CEN/TC 252.

If this draft becomes a European Standard, CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

This draft European Standard was established by CEN in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Recipients of this draft are invited to submit, with their comments, notification of any relevant patent rights of which they are aware and to provide supporting documentation.

**Warning :** This document is not a European Standard. It is distributed for review and comments. It is subject to change without notice and shall not be referred to as a European Standard.

## **European foreword**

This document (prEN 14344:2020) has been prepared by Technical Committee CEN/TC 252 "Child use and care articles", the secretariat of which is held by AFNOR.

This document is currently submitted to the second CEN Enquiry.

This document will supersede EN 14344:2004.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

## 1 Scope

This document specifies requirements for child seats intended to be mounted on cycles and electrical power assisted cycles with a cut off speed of up to 25 km/h (i.e. according to EN 15194), their attachment system and accessories intended to be attached to the seat in order to transport children with a weight from 9 kg up to 22 kg and who are capable of sitting unaided.

NOTE 1 Some European countries have special legislation for child seats for cycles. Compliance with this document might not meet this legislation.

NOTE 2 Where a child seat or any part of the child seat has several functions or can be converted into another function, other relevant standards might be applicable.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 71-1:2014+A1:2018, *Safety of toys - Part 1: Mechanical and physical properties*

EN 71-2:2011+A1:2014, *Safety of toys - Part 2: Flammability*

EN 71-3, *Safety of toys - Part 3: Migration of certain elements*

EN 1888-1:2018, *Child care articles - Wheeled child conveyances - Part 1: Pushchairs and prams*

CEN/TR 13387-3:2015, *Child use and care articles - General safety guidelines - Part 3: Mechanical hazards*

EN ISO 11243:2016, *Cycles - Luggage carriers for bicycles - Requirements and test methods (ISO 11243:2016)*

## 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia. available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

### 3.1

#### **seat**

child seat intended to be mounted on a cycle

### 3.2

#### **front seat**

child seat intended to be mounted on a cycle in front of the rider (between handlebar of the cycle and rider)

### 3.3

#### **rear seat**

child seat intended to be mounted on a cycle behind the rider

**3.4**

**reclining seat**

front or rear seat that can transport a child either in an upright or in a reclined sitting position

**3.5**

**guard**

device that reduces or prevents physical access to a hazard zone by closing off access to an area containing one or more hazards

**3.6**

**integral guard**

guard that is part of the seat (for example a foot guards) and cannot be removed or require use of tools to remove it

**3.7**

**removable foot guard**

guard that is always provided with the seat, or pre-assembled with, and can be removed

**3.8**

**reference plane**

plane defined by the top surface of the measuring device

**3.9**

**attachment system**

structure to attach the child seat to the cycle

**3.10**

**footrest**

structure to support the child's foot

**3.11**

**protected volume**

volume accessible by the child, when sitting in the seat, where specific safety requirements are necessary

**3.12**

**handlebar and handlebar stem assembly**

**3.12.1**

**handlebar**

part held by rider

Note 1 to entry: See Figure 1.

**3.12.2**

**extension**

part of the handlebar stem that positions the handlebar in front of the steering axis

Note 1 to entry: See Figure 1.
