About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

67 000 electrotechnical terminology entries in English and French extracted from the Terms and definitions clause of IEC publications issued between 2002 and 2015. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references	9
3 Terms and definitions	9
4 General conditions for testing	11
4.1 General.....	11
4.2 Atmospheric conditions	11
4.3 Lighting conditions	12
4.4 Test equipment and materials	12
4.5 Number of samples	12
4.6 Preparation of the battery	12
4.7 Running-in of a new cleaning robot	13
4.8 Operation of the cleaning robot	13
4.9 Measurement of collected dust weight	13
4.10 Measurement resolution and accuracy	13
4.11 Tolerance of dimensions	14
5 Cleaning performance – Straight line	14
5.1 General.....	14
5.2 Preparation of test	14
5.2.1 Pre-treatment of cleaning robot	14
5.2.2 Preconditioning of test floor	15
5.2.3 Pre-treatment of test carpet	15
5.3 Test mode.....	16
5.3.1 General	16
5.3.2 Access to test mode	16
5.3.3 Test mode action	17
5.3.4 Speed verification	17
5.4 Dust removal from hard floor.....	18
5.4.1 Test bed	18
5.4.2 Preparation of test	18
5.4.3 Test method	18
5.4.4 Determination of dust removal ability	19
5.5 Dust removal from carpet.....	20
5.5.1 Test bed	20
5.5.2 Preparation of test	20
5.5.3 Test method	20
5.5.4 Determination of dust removal ability	21
5.6 Medium size debris removal from hard floor	21
5.6.1 Test bed	21
5.6.2 Preparation of test	21
5.6.3 Test method	21
5.6.4 Determination of medium size debris removal ability	21
5.7 Medium size debris removal from carpet	22
5.7.1 Test bed	22
5.7.2 Preparation of test	22

5.7.3	Test method	22
5.7.4	Determination of medium size debris removal ability	22
5.8	Large debris removal from hard floor	22
5.8.1	Test bed	22
5.8.2	Preparation of test	22
5.8.3	Test method	24
5.8.4	Determination of large debris removal ability	24
5.9	Large debris removal from carpet	24
5.9.1	Test bed	24
5.9.2	Preparation of test	24
5.9.3	Test method	25
5.9.4	Determination of large debris removal ability	25
5.10	Fibre removal from carpet	25
5.10.1	Test bed	25
5.10.2	Preparation of test	25
5.10.3	Test method	27
5.10.4	Determination of fibre removal ability	27
6	Mobility	28
6.1	General	28
6.2	Test bed	29
6.3	Preparation of test	29
6.3.1	Test conditions	29
6.3.2	Preconditioning of test floor	29
6.3.3	Pre-treatment of cleaning robot	29
6.4	Test method	29
6.4.1	General	29
6.4.2	Minimum passable gap width	30
6.4.3	Minimum passable height	31
6.4.4	Maximum passable transition height	31
6.4.5	Maximum passable threshold height	32
6.5	Determination of mobility results	33
7	Autonomous navigation/coverage test	34
7.1	General	34
7.2	Preparation of test	34
7.2.1	Test bed	34
7.2.2	Test conditions	34
7.3	Test method	34
7.4	Performance measurement	36
8	Miscellaneous	38
8.1	Energy consumption of a cleaning robot	38
8.1.1	General	38
8.1.2	Test conditions	38
8.1.3	Test method	39
8.2	Airborne acoustical noise	41
8.3	Straight-line cleaning speed	41
8.3.1	General	41
8.3.2	Preparation	41
8.3.3	Test method	41
8.3.4	Determination of straight-line cleaning speed	42

9	Test material and equipment	44
9.1	Straight-line test bed.....	44
9.1.1	Hard floor	44
9.1.2	Carpet	44
9.2	Mobility test bed.....	45
9.2.1	Basic test bed configuration.....	45
9.2.2	Minimum passable gap width – additional equipment.....	46
9.2.3	Minimum passable height – additional equipment	47
9.2.4	Maximum passable transition height – additional equipment	48
9.2.5	Maximum passable threshold height – additional equipment	48
9.3	Coverage test bed.....	49
9.3.1	Floor configuration.....	49
9.3.2	Wall and ceiling configuration	55
9.3.3	General conditions.....	62
10	Instructions for use	63
Annex A (informative)	Calculation of coverage	64
A.1	Definitions.....	64
A.2	Calculating orifice pass coverage.....	64
Annex B (informative)	Comprehensive cleaning performance metric	66
Annex C (informative/normative)	Detailed images of fibre removal ability.....	67
Bibliography	72

INTERNATIONAL ELECTROTECHNICAL COMMISSION

SURFACE CLEANING APPLIANCES –

Part 7: Dry-cleaning robots for household or similar use – Methods for measuring the performance

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC/ASTM 62285-7 has been prepared by subcommittee 59F: Surface cleaning appliances, of IEC technical committee 59: Performance of household and similar electrical appliances, in co-operation with ASTM Committee F11: Vacuum cleaners, under the IEC/ASTM Dual Logo Agreement.

It is published as a dual logo standard.

This first edition of IEC/ASTM 62885-7 cancels and replaces IEC 62929:2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to IEC 62929:2014:

- a) the box test has been cancelled;
- b) the set of straight-line tests have been extended to contain also tests on removal of different kinds of debris both from hard floors and carpets;
- c) the set of straight-line tests also contains a test on the removal of fibres from carpets;
