5.4.2 Commercial installations 8

5.4.3 Residential installations 9

6 Installation methods 9

6.1 Planning, general layout, and dye batch continuity 9

6.2 Pile lay, pattern matching, dye batch continuity, and finishing 11

6.3 Seaming and joining 11

6.3.1 General 11

6.3.2 Methods of seaming and cross joining 12

6.4 Stretching 13

6.5 Method of installation using the carpet gripper system 13

6.5.1 General 13

6.5.2 Carpet gripper 13

6.5.3 Procedure 13

6.6 Method of installation using the direct-stick system 14

6.6.1 General 14

6.6.2 Ambient temperature 14

6.6.3 Laying procedure 14

6.7 Method of installation using the double-bond system 15

6.8 Method of installation using the pre-applied underlay adhesive system 16

6.9 Method of installation using the hook and loop system 16

6.10 Installation on stairs 17

6.10.1 General 17

6.10.2 Method of installation using the carpet gripper system 17

6.10.3 Method of installation using the direct-stick system 17

6.10.4 Method of installation using the double-bond system 18

6.10.5 Method of installation using the hook and loop system 18

6.11 Completion of installation 18

Annex A (normative) Site information to be requested by the contractor from the purchaser 19

Annex B (informative) **Determining the dryness and alkalinity of subfloors** **21**

Annex C (informative) **Principles of stretching textile floor coverings** **25**

Annex D (informative) **Guidelines to trowel selection** **31**

Annex E (normative) **Soft underlays for textile floor coverings** **33**

Annex F (normative) **Method for the determination of compression characteristics** **35**

Annex G (normative) **Method for the determination of resistance to breaking and cracking** **39**

Bibliography **41**

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee 219, *Floor coverings*.

This first edition of ISO 18167 cancels and replaces ISO/PAS 18167:2014, which has been technically revised.

The main changes compared to the previous edition are as follows:

- update of methods and standards referenced in [Annex E](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
