Refrigerators, frozen-food storage cabinets and food freezers for household and similar use — Measurement of emission of airborne acoustical noise

*Réfrigérateurs, conservateurs et congélateurs à usage ménager et
analogue — Mesure de l'émission du bruit aérien*

Reference number
ISO 8960:1991(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8960 was prepared by Technical Committee ISO/TC 86, *Refrigeration*.

Annexes A and B of this International Standard are for information only.

Introduction

The clause numbers in this International Standard correspond to those in IEC 704-1 on which the measurement method described in this International Standard is based.

For the purposes of this International Standard, the heading “**Replacement**” indicates that the text given in this International Standard replaces the relevant text in IEC 704-1; similarly the heading “**Addition**” indicates that the text given in this International Standard supplements the relevant text in IEC 704-1.
