ISO 7175-1

First edition 1997-08-01

Children's cots and folding cots for domestic use —

Part 1: Safety requirements

Lits fixes et lits pliants pour enfants à usage domestique — Partie 1: Exigences de sécurité

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7175-1 was prepared by Technical Committee ISO/TC 136, *Furniture*, Subcommittee SC 5, *Domestic furniture*.

ISO 7175 consists of the following parts, under the general title *Children's cots:*

- Part 1: Safety requirements
- Part 2: Test methods

Annex A of this part of ISO 7175 is for information only.

Children's cots and folding cots for domestic use —

Part 1:

Safety requirements

1 Scope

This part of ISO 7175 specifies requirements relating to the safety of children's cots and folding cots for domestic use.

It is applicable to cots and folding cots with an internal length of between 900 mm and 1 400 mm. It does not cover rocking and swinging cots.

Annex A summarizes the dimensions referred to in this part of ISO 7175.

2 Normative references

The following standards contain provisions, which, through reference in this text, constitute provisions of this part of ISO 7175. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this part of ISO 7175 are encouraged to investigate the possibility of applying the most recent editions of the standards listed below. Members of IEC and ISO maintain registers of currently valid International Standards.

ISO 8124-1—1), Safety of toys — Part 1: Mechanical and physical properties.

ISO 8124-3—1), Safety of toys — Part 3: Migration of certain elements.

ISO 7175-2:1997, Children's cots and folding cots for domestic use — Part 2: Test methods.

3 Definitions

For the purposes of this part of ISO 7175, the following definition applies.

3.1 folding cot: Tall-sided bed which can be dismantled or folded for transportation.

NOTE — This does not include items such as carry cots intended for the transportation of infants.
