JAPANESE INDUSTRIAL STANDARD

J I S

Gas burning space heaters for domestic use

S 2122-1991

## 1. Scope

This Japanese Industrial Standard specifies gas burning space heaters mainly for general domestic use<sup>(3)</sup> (hereafter referred to as appliance), using liquefied petroleum gas or city gas<sup>(1)</sup> (hereafter referred to as gas) as the fuel of marked gas consumption<sup>(2)</sup> of 18.6 kW: 67.0 MJ/h {appliance for liquefied petroleum gas 1.33 kg/h, that for city gas 16000 kcal/h} or less.

Notes <sup>(1)</sup> The liquefied petroleum gas means the gas described in "Standard of liquefied petroleum gas" of enforcement regulation (1968, Ministerial Notification of Ministry of International Trade and Industry No. 14) based on the Law Concerning the Securing of Safety and the Optimization of Transaction of Liquefied Petroleum Gas (1967, Law No. 149).

The city gas means the gas of gas group described in the Ministerial Notification concerning the verification and the like of gas products (1971, Notification of Ministry of International Trade and Industry No. 27) based on the Gas Utility Industry Law (1954, Law No. 51).

<sup>(2)</sup> The marked gas consumption means the gas quantity when using the appliance under the using condition at the maximum gas consumption, which is the marked value on the appliance.

<sup>(3)</sup> The gas burning space heater means the appliance to make the room warm according to convection, radiation, etc. by using the heat generated by gas combustion.

Remarks 1. Applicable Standards to this Standard are shown in the following:

JIS B 0203-Taper Pipe Threads

JIS S 2092-General Constructions of Gas Burning Appliances for Domestic Use

JIS S 2093-Test Methods of Gas Burning Appliances for Domestic Use
