## Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of International Trade and Industry through deliberations at the Japanese Industrial Standards Committee in accordance with the Industrial Standardization Law.

The purpose of this revision is to bring this Standard into conformity with the corresponding International Standard in terms of the corrosion resistance and thermal shock resistance of enamelled layer by boiling citric acid. Furthermore, the test methods, etc. to cope with the recent using environment and the actual state of products were made substantial.

Date of Establishment: 1958-12-12
