Foreword

This translation has been made based on the original Japanese Industrial Standard revised by the Minister of Economy, Trade and Industry through deliberations at the Japanese Industrial Standards Committee as the result of proposal for revision of Japanese Industrial Standard submitted by Japan Construction Material & Housing Equipment Industries Federation (J-CHIF)/ Japanese Standards Association (JSA) with the draft being attached, based on the provision of Article 12 Clause 1 of the Industrial Standardization Law applicable to the case of revision by the provision of Article 14.

Consequently **JIS A 4420 : 1998** is replaced with this Standard. The revision of this time is intended to take measures against the problem of sick houses by revising the part concerning the materials likely to scatter formaldehyde and, moreover, to make this Standard conform with the presentation specified in **JIS Z 8301**, modify a part of figures and transfer the units to SI system

Attention is drawn to the possibility that some parts of this Standard may conflict with a patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have technical properties. The relevant Minister and the Japanese Industrial Standards Committee are not responsible for identifying the patent right, application for a patent after opening to the public, utility model right or application for registration of utility model after opening to the public which have the said technical properties.

Date of Establishment: 1981-03-01

Date of Revision: 2005-11-20

Date of Public Notice in Official Gazette: 2005-11-21
